

IDLE FREE LINN

The Truth about Vehicle Idling

**Turn off your car when in PARK for
more than 10 seconds.**

What is Idling?

Idling occurs when a car is running but is going nowhere.

Save Money On Fuel

Turn off your car when in PARK for more than 10 seconds to save gas and money. Idling for an hour can waste half a gallon or more of fuel.

Warming Up

Today's engines warm up faster when you drive the car. Today's engines only need 30 seconds to warm up.

Restarting the Engine

Restarting your vehicle is more efficient than leaving it running. Modern ignition systems require very little gas to restart.

Breathe Easy

When you turn off your car when in PARK instead of idling, you reduce pollution. This helps people breathe easier.
