

Social care is community care is health care

In partnership with Unite Us, CyncHealth is enabling healthcare and social care providers to address social needs and improve health across communities through enhanced care coordination and delivery across Nebraska, Iowa, Kansas, Minnesota, Missouri, North Dakota, and South Dakota.

Meet people where they are, when they need support the most

Unite Iowa is a community data exchange (CDE) that connects partners through a shared technology platform, Unite Us, that enables them to send and receive electronic referrals, engaging community members in care that extends beyond the traditional healthcare space.

Identify gaps in services to proactively address barriers to care and increase health equity in your community.

Improve your clients' health and well-being through strengthened collaboration with partners offering a wide array of services.

Easily refer and connect your clients to local services they need.

Track the outcomes of all referrals and services delivered for your clients.

Improve organizational capacity through accurate referrals and access to a wealth of data on local service delivery.

Care for patients on the journey to and through healthcare

Food assistance programs

Medical assistance programs

CyncHealth, a 501(c)(3) organization, is a public health data utility that gives healthcare organizations the power to connect the dots across all points of patient care. It's more than sharing data between providers—CyncHealth empowers patients and their care teams to work together for better health outcomes, lower costs, and thriving communities.

Let's achieve our shared goal of healthier communities - together.
